## 410 QDT STAINLESS STEEL DATASHEET

410 QDT stainless steel is a Martensitic stainless steel with 12% Chromium. 410 QDT stainless steel can be heat treated to various levels to achieve a variety of mechanical and hardness values as required by specification and application need. 410 QDT stainless steel (Quench & Double Tempered), is a heat-treated variation of 410 stainless steel. The 410 QDT stainless steel variant is suitable for use in oil & gas sour gas (H<sub>2</sub>S) services, where it maintains corrosion resistance.

Common industry/applications for 410 QDT stainless steel include: Automatic Production Parts, Petrochemical processing, Medical instruments, and Knives and Tooling.

Product forms include round bar, plate & sheet, and forgings.
